NISSAN  INTELLIGENT MOBILITY

NEXT-LEVEL TECHNOLOGY FOR A CONFIDENT AND ENERGIZING DRIVE

Nissan Intelligent Mobility is redefining the way we power, drive and integrate cars in the world around us. It's bringing you and your X-TRAIL closer together for a more confident, more exhilarating ride. It's making your journey more personal through advanced connectivity and empowering you through progressive technologies. It's enhancing the joy of being behind the wheel and turning the world into a safer place everyday.

BREATHTAKING FROM TOP TO BOTTOM

Want to share an inspiring view on a starry night? Need a cosy refuge on a chilly morning? X-TRAIL makes sure you're well taken care of.

To design their zero-gravity-inspired seats with spinal support, Nissan's engineers looked to the cosmos. They recreated the relaxed posture of astronauts floating in space by designing an articulated front seat that supports you from the pelvis to the chest optimizing the blood flow, and seat cushions that provide better pressure distribution. The result is exceptional comfort and less fatigue on your long distance adventures.

More inspiration comes from the available Power Panoramic Moonroof, offering everyone aboard the most stunning theatre view of the sky and stars.

X-Trail includes two important Nissan technologies to help keep you and your family safe on the road. Intelligent Cruise Control adjusts your speed to match the road conditions ahead, while Lane Keep Assist steers the car if you drift over the line. Relax, stay focused: We've got your back.

DRIVE MORE LIKE A PRO
X-TRAIL, QUIETLY MAKING YOU A BETTER DRIVER.

The X-TRAIL is so agile and responsive, it actually improves your driving. Nissan's Chassis Control technologies make it smooth to handle and supple yet secure to drive – ensuring an exciting yet comfortable journey for everyone on board. So pile in and have some fun.

INTELLIGENT RIDE CONTROL.

Take the rough with the smooth. This system applies subtle braking to prevent turbulence over bumps and enhances the overall comfort of the ride for the whole family.

INTELLIGENT TRACE CONTROL.

Keep cool when cornering. This system adjusts brake pressure on individual wheels to keep you on an optimal line through turns.

INTELLIGENT ENGINE BRAKE.

Feel the curve. This system controls the CVT as though you're driving manual through a light bend. It shifts down to smoothly decelerate on your way through the curve, then shifts back up to accelerate on your way out.

DRIVE MORE LIKE A PRO

ADAPT TO RAIN OR SLEET IN THE BLINK OF AN EYE

The X-TRAIL can adapt to changing conditions 30 times faster than the blink of an eye. Whether it's snow, rain-covered pavement or a tight turn, the system will automatically send power to the wheels that need it the most. Even in ideal conditions, the X-TRAIL's Intelligent 4x4 system pays big dividends: getting a grip has never felt better.

HILL START ASSIST/AUTO HOLD. No rolling backwards. With Hill Start Assist, encountering an incline is simple. It applies the brakes to all four wheels to hold the car for 3 seconds, before the drive fed to the wheels releases them. With the Auto Hold function activated, the brakes are held for 3 minutes on any gradient.

INTELLIGENT 4x4. With X-TRAIL's All-Mode 4x4-i, you've got a system that's capable on-road and off. You can choose full-time 2WD for maximum efficiency. Auto Mode constantly monitors conditions and adjusts the balance of power between front and rear.

INTELLIGENT POWER
**GO FURTHER WITH
 A CLEAN CONSCIENCE**

Looking for excellent fuel economy in a roomy SUV that's lots of fun to drive? That's what you get with X-TRAIL. From exterior aerodynamics that whisper through the wind to advanced engines transmissions including the virtually gearless XTRONIC and the dual clutch DCT transmissions, it takes efficiency and performance to the next level.

Powering the all-new X-Trail are the advanced 1.7 litre diesel and the 1.3 litre petrol engines providing enhanced fuel economy, lower CO₂ emissions and higher performance. Each engine also features Nissan's automatic Start/Stop system, which shuts down the engine when temporarily not in use - at traffic lights for example - to save fuel, then smoothly and quickly restarts as you pull away.

In the latest version of XTRONIC (Continuously Variable Transmission), friction is reduced up to 40% and the ratio coverage is increased to greater than that of some 8-speed automatics. Eco mode improves fuel economy at the touch of a switch. Combined with such smooth performance, it's like riding a continuous wave of power.
